

What Makes the Viper WRL Unique?

- The Viper Wire Rope Lubricator is supplied as a complete package, with all the components required to get you started.
Simply order the kit and then select and order the seals and scrapers to suit the rope size to be lubricated.
- Cast handles in the collar allow for one-person operation.
- Special Seal design – larger area of contact with the rope than any other lubricator. Increased rope “dwell time” in the collar.
- Interference fit instead of exact fit provides better in-field results due to the varied rope sizes available.
- Seals hydraulically work the lubricant into the core of the Wire Rope, unlike some designs that just rub lubricant onto the outer surface.
- Robust construction.
- Cleaner to operate due to drain outlet, excess lubricant is captured and may be re-used.
- High volume grease pump enables fast lubrication of ropes
